

Environmental Policy

Ecore Construction Ltd is fully committed to the prevention of pollution, and protecting and minimising the effects of operations on the environment.

Ecore Construction Ltd intends to enhance environmental management and achieve continual improvement in the following areas:

1. Assess the environmental impact of proposed construction works prior to commencement of works.
2. Implement environmental planning, control and monitoring of all activities, which recognises and respects the physical, economic and social environments of all the communities in which we operate.
3. Using resources such as energy, water and raw material efficiently and taking opportunities to minimise waste through re-use and recycling.
4. Reducing the effect of noise, dust, disturbance and inconvenience from operational activities and minimising CO₂ emissions as far as practicable.
5. Working closely with, partners, designers, consultants, suppliers, subcontractors and, where appropriate, members of the community, to develop good environmental practices and solutions.
6. Liaise and co-operate with the appropriate enforcing authorities on environmental issues and comply with all relevant legislation. We will seek to continually improve performance; compliance with legislation will be our minimum standard.
7. Ensuring timely response to complaints from third parties and the reporting of incidents and accidents.
8. Publish and maintain an organisation and arrangements for the planning, control, monitoring and review of our management of environmental performance. Suitable training will be provided to enable employees to carry out their allocated duties.
9. Bring the contents of this policy to the attention of all employees.
10. Make the contents of this policy available to interested parties on request.
