

Sustainability Policy

Ecore Construction Management Ltd is committed to promoting sustainability. Concern for the environment and promoting a broader sustainability agenda are integral to professional activities and the management of the organisation. We aim to follow and to promote good sustainability practice, to reduce the environmental impacts of all our activities and to help our clients and partners to do the same.

Our sustainability definition and ambition

We endorse the spirit of the 'Brundtland' and 'Caring for the Earth' definitions of sustainable development: 'development that meets the needs of the present without compromising the ability of future generations to meet their own needs' and 'improving the quality of life while living within the earth's carrying capacities'.

What this means to us is that we operate our professional activities and the management of our organisation in a way that enables all people to realise their potential and improve their quality of life while protecting and enhancing the earth's natural capital. This aspiration is operationalised for our purposes by our sustainability objectives, targets and indicators.

We are therefore committed to continually improve the integration of sustainability into our working environment and business processes. Our aim is to play a proactive role in contributing to achieving sustainability where we have influence. We are committed to accountability and transparency in our sustainability performance.

Our Sustainability Policy is based upon the following principles:

- To comply with, and exceed where practicable, all applicable legislation, regulations and codes of practice.
- To integrate sustainability considerations into all our business decisions.
- To ensure that all staff are fully aware of our Sustainability Policy and are committed to implementing and improving it.
- To minimise the impact on sustainability of all office and transportation activities.
- To make clients and suppliers aware of our Sustainability Policy, and encourage them to adopt sound sustainable management practices.
- To review, annually report, and to continually strive to improve our sustainability performance.
